

METAL COLOURS

TECHNICAL SERVICES

The Technical Centre is directed by an experienced professional chemist whose principal responsibility in conjunction with the Quality Control Manager, is the maintenance of the highest standard of quality control for all clients' work.

The Centre operates state of the art analytical technology, including x-ray fluorescence equipment for the determination of plated metal thickness and zinc alloy analysis, an atomic absorption spectrophotometer, a potentiostat, and a large salt spray corrosion testing cabinet.

The Centre is also responsible for the optimum process control of the plating electrophoretic lacquer and powder coating plants.

QS 9000 ACCREDITATION

Metal Colours is one of a very few contract surface finishing companies to have been awarded the coveted QS 9000 standard.

QS 9000 is the harmonised quality system requirement for the supplier of the "big three" automotive manufacturers - Chrysler, Ford and GM.
